Tools & Practices

- Git & GitHub
- REST APIs
- Responsive Design
- UI/UX

EDUCATION

B.Sc. Information Technology

D.G. Ruparel College
University of Mumbai
2023 – 2026 · Final Year **9.10 CGPA**

HSC · Commerce

KES Shroff College
Maharashtra State Board
2023 **84.83%**

SSC

Shree Ekveera Vidyalay
Maharashtra State Board
2021 **91.60%**

Profile

Final-year B.Sc. IT student with a genuine interest in building clean, responsive web and mobile applications. Comfortable working across the full stack — from crafting accessible UIs with React.js to wiring up backends with Node.js and MongoDB. Enjoy thinking through user experience, writing organized code, and picking up new tools as needed. Looking for a fresher developer role where I can contribute meaningfully and keep growing.

Projects

Glamware — Virtual Wardrobe Mobile App

SHIPPED

React Native Node.js Express.js MongoDB

- Built a mobile app allowing users to digitally catalogue and organise their wardrobe collections
- Designed an avatar-based personalisation flow with smooth, cross-screen responsive UI components
- Structured a REST API with Node.js and Express to manage clothing records and user data in MongoDB

github.com/mitalikhamkar/Glamware-app

Culina — Cook What You Have

IN PROGRESS

React.js JavaScript HTML / CSS YouTube API REST API

- Building a recipe discovery web app that suggests meals based on ingredients the user already has
- Implementing ingredient-based search, cuisine filters, and a "Surprise Me" random recipe feature
- Embedding tutorial videos via YouTube API; designing a fully responsive, mobile-friendly layout

Additional Frontend Projects

- Responsive Dashboard UI
- Interactive Quiz App
- To-Do Productivity App
- Product Card Design
- Landing Page Clones

A set of standalone UI projects built to practise component structure, layout patterns, and responsive design across varied use cases.
